

Dear Patient -

Your doctor has identified you as a potential candidate for spine surgery using patient specific interbody devices. Carlsmed will use your x-rays and CT scans to create devices that are personalized to best address your situation and fit against the unique contours of your bone. This design process may require new imaging to provide the most recent and detailed data possible. If your doctor has ordered new imaging, it is important that you complete this as soon as possible. To help defray travel or any ancillary cost, Carlsmed will provide a patient stipend of \$50 via a gift card to you for completing this important step.

After you have booked your appointment, please visit the Carlsmed website at Carlsmed.com, or scan the below QR code. You will need to provide your name, the name of your doctor, and the date of the CT appointment. Your gift card will arrive in the mail within 1-2 weeks after we have received confirmation from your physician's office.

Thank you for taking this important step to participate in your healthcare.
Sincerely,
Carlsmed

CAUTION: The aprevo® personalized interbody devices are intended for use in patients with a broad range of degenerative conditions of the lumbar spine when non-operative treatment has failed. Only a licensed physician can help you determine the appropriate medical treatment. There are potential risks to spine surgery, and individual results may vary. Before making any decisions concerning medical treatment, consult your physician regarding your options and the risks of those options. Improvements in pain and function will depend on various factors, including your physical condition, your activity level, adherence to your physician's instructions, and other factors. USA federal law restricts this device to sale by or on the order of a physician
